

CLAIM AMENDMENTS

Claim 1 (Currently Amended): A remote control device, comprising:

a feedback device for receiving signals from an electronic device, the feedback device

including:

a receiver;

a processor in communication with the receiver; and

an output device in communication with the processor, wherein the output device

includes a speaker, and wherein the speaker is configured to receive an activation signal from the

processor and to emit an audible signal indicative of the signal from the electronic device.

Fig. 3,

Claim 2 (Currently Amended): The device of claim 1, wherein the output device further

includes at least one of a light source, an LCD display, and an LED display, ~~and a speaker.~~

fig 5

Claim 3 (Original): The device of claim 1, wherein the feedback device is located on a housing of the remote control device.

Claim 4 (Original): The device of claim 1, wherein the feedback device is located in a housing of the remote control device.

Claim 5 (Currently Amended): The device of claim 1, wherein the feedback device is for displaying one of a weak signal indication and a low ~~batter~~ battery power indication.

Claim 6 (Original): The device of claim 1, wherein the remote control device is a universal remote control device.

Sub 1
B1
A1
Claim 7 (Currently Amended): A feedback device attached to an electronic device, the feedback device for providing feedback to a user in response to inputs entered into a remote control device, the feedback device comprising:

a receiver;

a processor in communication with the receiver; and

an output device in communication with the processor, wherein the output device includes a speaker, and wherein the speaker is configured to receive an activation signal from the processor and to emit an audible signal indicative of the signal from the electronic device.

Claim 8 (Original): The device of claim 7, further comprising an input device in communication with the processor.

Claim 9 (Original): The device of claim 7, further comprising a storage area in communication with the processor.

Claim 10 (Original): The device of claim 7, wherein the output device further includes at least one of a light source, an LCD display, and an LED display, ~~and a speaker.~~
